**FastCAM MTO
At last a Standard for
Material Take-Off**

Absolute Simplicity.

FastCAM[®] MTO is designed as the fastest way to enter structural take-offs into "sort able" lists for estimating and factory production.

- ✓ Built in Comprehensive Section Catalogues.
- ✓ FastCAM[®] Quoter compatible.
- ✓ Command line data entry, ultra fast.
 1. Select the Sections.
 2. Enter the length /material.
 3. Now Sort the data with a single Click.
- ✓ Print Sorted Take-Off lists.
- ✓ Cut and paste from BOM Data.
- ✓ Cut & Paste to/from Excel and other software.
- ✓ Email your MTO files.
- ✓ Eliminate time consuming manual take-offs, do it once and get it right first time.
- ✓ Output includes mass and surface areas ideal for estimating.

Select the section, grade and length.

Sort your data ready to estimate and nest.
