

# FastCAM® Outline™ for Images

*Allows you to use Burning Machines to Cut Pictures*

✓ Use existing images or scan them

✓ Automatically smoothes and compresses lines and arcs

✓ Ideal for Metal Cutting

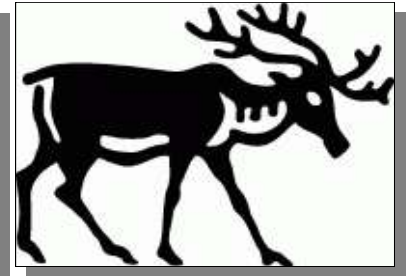

✓ No Training

*FastCAM Inc produce a complete range of software for the metal processing industry.*

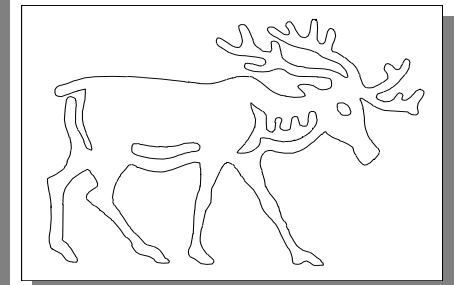

FastCAM® Outline™ allows the easy conversion of BMP, TIFF, JPEG image files into the DXF file format for the quality cutting of pictures.

FastCAM® Outline™ produces files of lines and arcs ensuring that the generated DXF file is turned into good NC code for your burning machine.

Expand your services to cut logos, stencils, artwork etc

Original image from Artwork or Scanner

DXF output ready for Cutting

**Cut the images on Oxy-Fuel, Laser or Waterjet equipment**
