

FASTCAM FABRICATION SOFTWARE

FastFRAME™ Structural Pipe Developments

FastCAM®

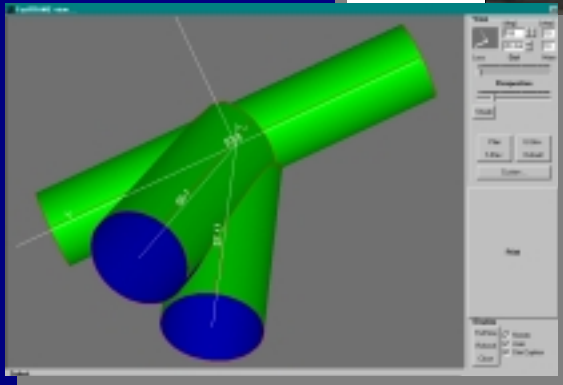

The World Standard in Profiling Software

**FastFRAME
FastPIPE**

*Pipe and frame development
software for complex structural
fabrication.*

*Direct templates for marking or
NC code direct to machinery
System includes
PBRANCH™
Set-In type I*

**Set-On type II
FastPIPE™
FastFRAME™**

*Compensation for weld
preparations to international
standards*

*True 32Bit Windows Software for
Windows 95, 98, NT, 2000 &
Windows Me*

FASTCAM FABRICATION SOFTWARE

PC Based Production Software for Tube and Pipe Construction

FastCAM Inc has released its latest product in the FastSHAPES range. FastFRAME™ is a powerful production tool for the construction industry which is ideally suited to tubular spaceframe construction. In conjunction with FastCAM's other pipe and tubular products the suite of programs covers the majority of fabrication issues for pipe and tubular construction.

FastSHAPES™ Pipe products include

Pbranch "I" for "set-In" type joints

Pbranch "O" for "Set-On joints

FastPIPE covers single and double ended tubular intersection.

FastFRAME covers complex spaceframe construction.

All products are suitable for the production of flat patterns, "Wrap Patterns" or code for NC controlled machinery.

Compensation for complex weld intersections and preparation are included, these cover common standards such as AWS, Cidec and others.
